SUMMARY

Motivated Web Developer with 2+ years of Academic experience in designing and building websites in University Technology Malaysia (UTM). Specialties include creating responsive layouts, optimizing user interfaces, and working with major programming languages. Skilled in integrating databases, debugging code, and staying current with emerging technologies. Eager to apply technical skills and creativity to develop impactful web applications in a collaborative, growth-oriented environment.

ACADEMIC EXPERIENCE

Academic Exchange Program: Sustainable Web Development Practices Jan 2024 - Dec 2024
University of Cambridge (Online Program)

Using Laravel and Bootstrap, a sustainable CMS was created, with server-side caching and improved SQL queries to maximise energy efficiency. Installed on AWS with success, guaranteeing scalability and garnering praise from the professors for fusing sustainability with contemporary web development.

Capstone Project: Responsive E-Commerce Website Development Jan 2023 - Dec 2023
Harvard University (Online Program)

Using React.js, Node.js, and MongoDB, we worked together to create a fully responsive e-commerce website with smooth front-end and back-end communication over RESTful APIs. Demonstrated expertise with HTML, CSS, and JavaScript, among other contemporary web technologies.

EDUCATION

UNIVERSITY OF TECHNOLOGY MALAYSIA-UTM

Malaysia- Johor Bahru

Bachelor Of Computer Science (Software Engineering)
With Honours Computing

Anticipated Graduation: Feb2026
